CAMPUS CONNECT

2025–2026 REPORT CARD

Connecting and Educating African students to BitcoinCash

Program report H1 2026 - prepaid for the BitcoinCash Community

CAMPUS CONNECT

Flexi HUB

About Us

BitcoinCash Campus Connect.

By bringing the Bitcoin Cash vision directly onto campuses, Campus Connect gives students hands-on exposure to peer-to-peer digital cash, practical blockchain literacy, and the tools to actually build with the technology not just talk about it. Instead of leaving young Africans to piece together fragmented information online, the initiative creates a structured pathway: workshops, campus ambassadors, and real-world use cases that show students how BCH can power everyday commerce and financial inclusion across the continent.

The goal isn't just awareness it's capacity. Campus Connect aims to turn curious students into informed users, builders, and advocates, ensuring the next wave of African innovation is grounded in genuine understanding of what Bitcoin Cash makes possible.

Program Overview & Objective

Purpose Over Perfection

- Teach the fundamental
- Turning ideas into real solutions
- Build hands on skills
- Grow local Adoption
- Measure Real Impact

MISSION

Empowering African students through cryptocurrency Education, to foster adoption and bring about financial inclusion, We're building a network of informed, skilled students across African universities who understand how cryptocurrency can solve real problems from cross-border payments and remittances to financial inclusion and entrepreneurship. Campus Connect equips the next generation with knowledge and tools to participate in the global digital economy

CAMPUS CONNECT

Reach & Participation

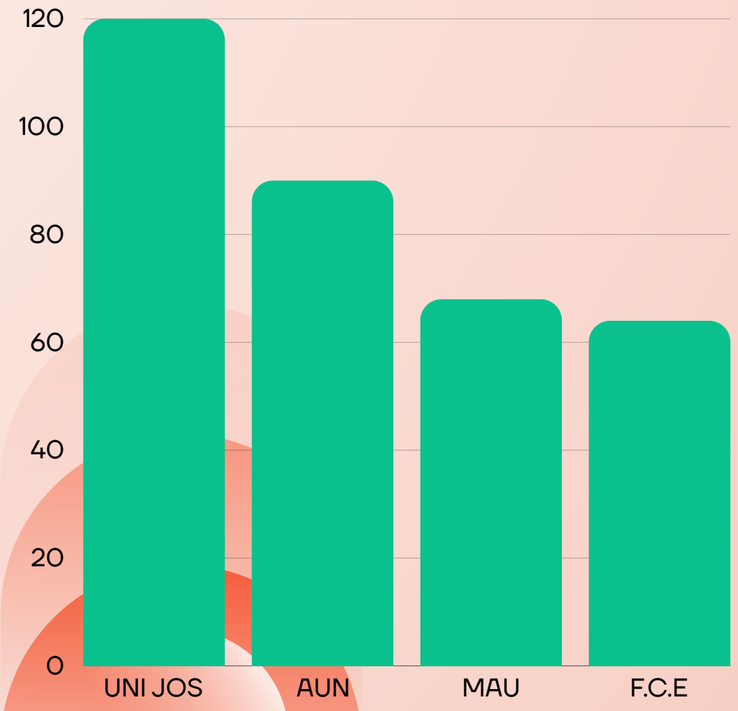

Illustrative figures replaced with verified Cohort Data before publishing

400+ Students Reached

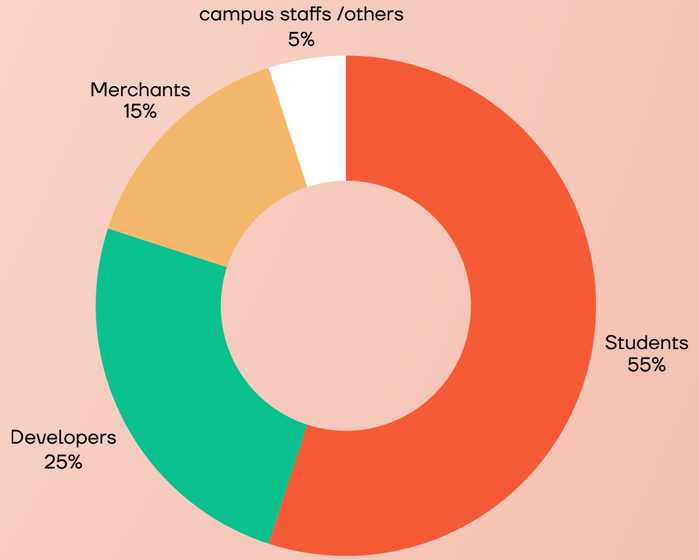

5 Campuses

10 Workshops

87% Completed

Students Reachhed by Campuses

Participants Mix

Hands on Outcome

what students actually did with what they learnt, the matric that matters more to this community

5 Student led BCH meet-ups

48 Merchants onboarded

1000 on-chain tx

12 Product Demo

CAMPUS CONNECT

Impact & Behavioural Changes

68% of surveyed participant reported to perform atleast 1 BitcoinCash transaction 30days affter their workshop

Partnerships & Ecosystem Support

Campus Connect runs on collaboration, not single organisation

Challenges & Lesson learned

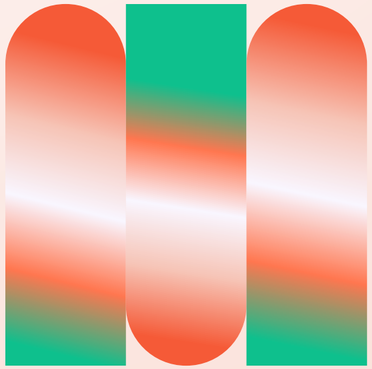

The first cohort of Campus Connect was as much a lesson in resilience as it was a milestone for grassroots BCH adoption. Rolling out a program meant to bring Bitcoin Cash education directly to university students came with real friction the kind that doesn't always make it into recap threads, but shaped every step of the journey.

⚠️ Travel Bottlenecks

Coordinating across campuses, sometimes in different states or regions, meant organizers and facilitators had to absorb transport costs and long commute hours just to show up. Poor road networks, unpredictable transport fares, and tight schedules made it difficult to guarantee consistent presence at every campus on the calendar. More than once, sessions had to be rescheduled or condensed because a facilitator was still in transit.

⚠️ Low Community Visibility

Coordinating across campuses, sometimes in different states or regions, meant organizers and facilitators had to absorb transport costs and long commute hours just to show up. Poor road networks, unpredictable transport fares, and tight schedules made it difficult to guarantee consistent presence at every campus on the calendar. More than once, sessions had to be rescheduled or condensed because a facilitator was still in transit.

⚠️ Funding Constraints

Like most grassroots efforts, funding lagged behind ambition. Stipends for volunteers, printing of educational materials, and even basic session logistics were often self-funded or covered through informal contributions. This limited how many campuses could be reached in the pilot phase and forced organizers to prioritize ruthlessly.

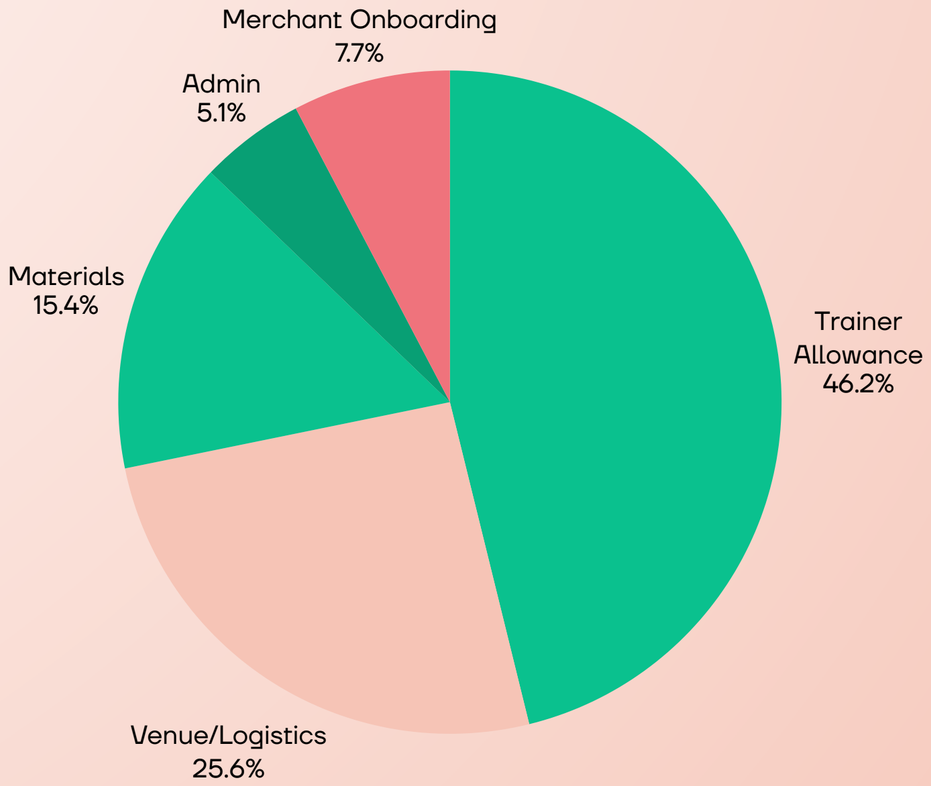

⚠️ Space Rental Challenges

Securing suitable venues was harder than expected. Many campuses required formal bookings with fees attached, and last-minute availability issues sometimes forced sessions into cramped or less-than-ideal spaces hardly the environment needed to properly introduce peer-to-peer electronic cash to newcomers.

Financial Transparency

Communinty funds accounted for line by line

Total Budget ($3150)

Total Spent ($2950)

Student Reach (400+)

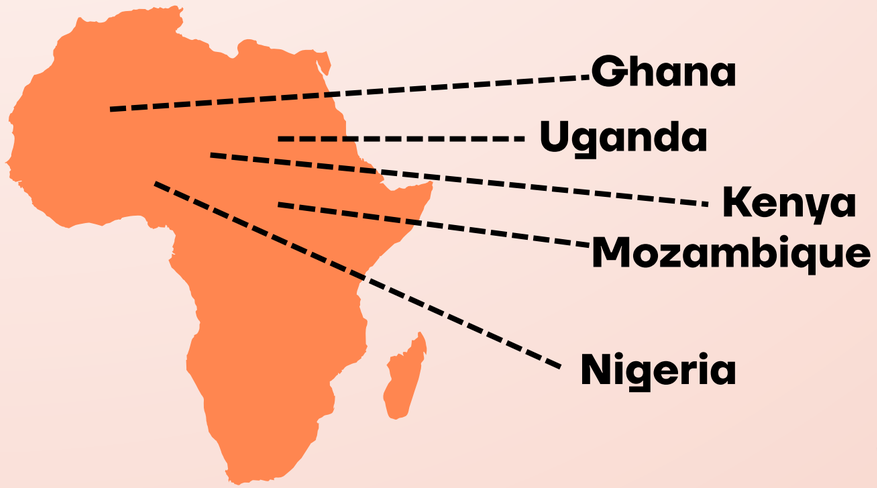

CAMPUS CONNECT

Flexi HUB

Sustainability & Next steps

From pilot cohort to selfsustaining to self sustaining student led network

Scale to 5 Countries

Merchant Network Growth

Train the Trainer

Community Fundinng Round

we will expand beyound current footprints using strategic partnerships and target more campuses accross the continent

Help take CAMPUS CONNECT Further

Thank you to all community members and circular economy collaborating to make it happen
